THE GROGGERY MUST GO. Platform of the Anti-Saloon Republican Party of New York.

SYRACUSE, N. Y., Dec. 16 .- The antisaloon republican state committe adopted to day a platform declaring that there is an irrepressible conflict between the liquor traffic and Christian civilization; that the saloon ought and has just been paid. to be utterly extirpated, because the proprietors have combined in open war against the American sabbath : that the compact between brewers and distillers has reached a point where the republican party must accept the issue and with "no uncertain sound declare determined hostility to these enemies of good morals and the sacred institutions of our land, or abandon their claims to be a party of law and order, opposed to vice and crime, anarchy and socialism." The platform points to Pennsylvania as an example of success resulting from a bold stand, and favors prohibition amendments and local option and restriction by taxation.

Texas Wheat.

FORT WORTH, December 19 .-- Reports were received here to day from thirty-four counties, comprising the winter wheat district of north and western Texas. Eighteen counties report an increase in acreage of from 10 to 100 per cent. Seven counties report a decrease in acreage of from 5 to 30 per cent. and four counties report about the same acreage. Nearly 75 per cent. of last year's crop was a failure in western Texas, owing to the long drouth. The situation this year is the reverse. Rain has been more plentiful than for ten years past. A splendid stand is reported and where the acreago shows a decrease, it is due to the scarcity of seed wheat. No more rain is needed until March or April.

The indications are to-day that the vield will be from twenty-five to thirty-five bushels per acre. Eastern Pexas has produced little or no wheat since the war until the last year.

A tendency has developed to go back to wheat culture, and this year more wheat has been sown in eastern Texas than during the whole period since the close of the war.
